

It's who's inside that counts: Improving design with each occupant in mind.

Cushing Terrell's Post-Occupancy Evaluation (POE) program offers insight into user satisfaction, system operation, and energy consumption, while helping to uncover opportunities for continued improvement. Each project is unique, and we will develop and administer a POE plan tailored to your specific needs.

It's who's inside that counts: Improving design with each occupant in mind.

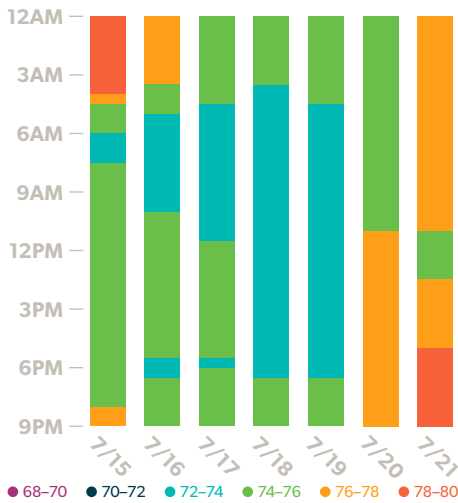

Cushing Terrell's Post-Occupancy Evaluation (POE) program offers insight into user satisfaction, system operation, and energy consumption, while helping to uncover opportunities for continued improvement. Each project is unique, and we will develop and administer a POE plan tailored to your specific needs.

Our menu of POE services includes:

- Developing and administering occupant satisfaction surveys
 - In-person interviews with building occupants and operators
 - Measurements and analysis of temperature, humidity, lighting levels, noise levels, and other variables
 - Analysis of Building Automation System (BAS) data
 - Utility bill analysis
 - Reporting of findings and recommendations
 - Credit documentation for green building certification programs
- Some POE services, such as online surveys and utility bill analysis can be performed without incurring travel costs.**

Cushing Terrell's POE team comprises architects, engineers, and design professionals who share a passion for using data to answer challenging questions, and a commitment to improving the human experience in the built environment.

Measured Indoor Temperature (deg F, average)

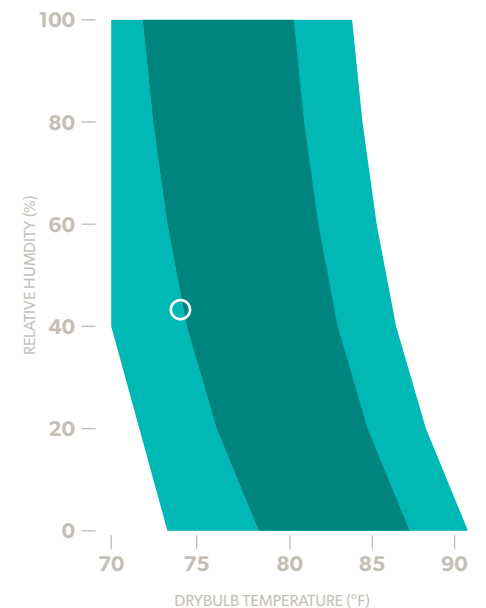

Interior Light Levels

How satisfied are you with your personal workspace? (-3 very dissatisfied, 0 neutral, +3 very satisfied)
