

INTERNSHIP PROGRAM

CIVIL ENGINEERING

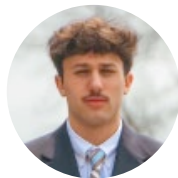

Providing specialized learning opportunities to help students gain valuable skills and knowledge.

Are you looking to jump-start your career with real-world experience? At Cushing Terrell, we offer an internship program with tremendous opportunities to further your understanding of the architecture, engineering, and design industry. The program will immerse you in day-to-day work, learning alongside design professionals and working on actual projects. Experience the full integration and coordination of a multidisciplinary firm and be mentored by team members who are passionate about delivering imaginative, responsible, first-of-their-kind environments.

Interning with Cushing Terrell's Seattle land development team was one of the most rewarding milestones in my engineering career. Rather than being assigned repetitive tasks, I tackled real site design challenges, navigated municipal codes, and learned directly from experienced engineers who always made time to guide me. The office culture is supportive, fast-paced, and collaborative, making it the ideal place to build practical engineering skills and see projects move from concept to reality.

Adam El-Mobdy
Civil Engineering Intern

What to Expect as a Civil Engineering Intern

- A fun and creative work environment
- Real-world civil engineering and construction administration experience
- Mentorship to guide you as you tackle day-to-day challenges
- Work alongside and learn from professionals in a variety of disciplines
- Develop a base foundation of engineering principles and code requirements that build on your college experience
- Hands-on experience performing civil engineering calculations and designing site and infrastructure elements
- Support civil engineers in the design & plan production of roadway, grading & drainage, water, sewer, pavements, land development, and erosion control systems
- Participating in site visits prior to and during construction
- AutoCAD Civil 3D drafting & design
- Quantities takeoffs & estimating
- Researching and applying jurisdictional criteria for planning and engineering
- Gain exposure to the variety of project types we complete at Cushing Terrell with access to the teams who complete them
- Introduction to the business side of the architecture/engineering industry
- A memorable experience that will equip you with tools for setting and reaching your career goals

The Cushing Terrell Experience

Our civil engineering team thoughtfully shapes landscapes to suit each client's unique vision. We support our clients in every aspect of project planning and phasing, bringing our experience in the design of parks, scenic byways, residential sites, corporate developments, large public and private land developments, and more. Quality and longevity are paramount when it comes to development and infrastructure design, which is why our civil team is comprised of experts from across all aspects of planning, land development, and infrastructure engineering.

By integrating architecture, engineering, urban planning, landscape architecture, interior design, and more, we approach the design of the built environment with a holistic mindset and a goal of contributing to sustainable systems and spaces that help people live their best lives. Our broad range of specialized service offerings, global project locations, and a love for exploration, research, and discovery make each day a unique adventure.

I'm proud to be working with a team to help and solve real-world problems.

Graham Carter
