

INTERNSHIP PROGRAM

COMMISSIONING

Providing specialized learning opportunities to help students gain valuable skills and knowledge.

Are you looking to jump-start your career with real-world experience? At Cushing Terrell, we offer an internship program with tremendous opportunities to further your understanding of the architecture, engineering, and design industry. The program will immerse you in day-to-day work, learning alongside design professionals and working on actual projects. Experience the full integration and coordination of a multidisciplinary firm and be mentored by team members who are passionate about delivering imaginative, responsible, first-of-their-kind environments.

Every project at Cushing Terrell provides an opportunity for me to learn something new, both from my teammates working in the office and the experienced professionals working all across the U.S.

Brooklyn Helmer
Energy Services Intern

What to Expect as a Commissioning Intern

- Gain real-world project experience with mentorship from experienced professionals
- Collaborate with multidisciplinary teams
- Participate in site visits throughout the construction process and during the testing phase
- Hands-on experience testing HVAC equipment utilizing building automation systems
- Learn to review and understand Construction Documents.
- Learn the entire Commissioning process from start to finish utilizing commissioning specific software
- Work with clients and contractors to help close out high-performance projects
- Experience a fun and creative work environment
- Gain exposure to the business side of the architecture/engineering industry
- Develop professional skills and tools to support long-term career growth and success

The Cushing Terrell Experience

Creating high-performing building systems that operate efficiently and sustainably from day one is the primary focus of Cushing Terrell's Commissioning team. With expertise in automation, HVAC, plumbing, life-safety, and lighting controls, we help reduce costs, improve efficiency, and maximize occupant comfort by ensuring systems are properly installed, tested, and optimized to meet project requirements and achieve the design intent.

By integrating architecture, engineering, urban planning, landscape architecture, interior design, and more, we approach the design of the built environment with a holistic mindset and a goal of contributing to sustainable systems and spaces that help people live their best lives. Our broad range of specialized service offerings, global project locations, and a love for exploration, research, and discovery make each day a unique adventure.
